

Dissemination activity of EIFN: *Presentation at annual conference „Thermal Energy and Technologies“ at Kaunas University of Technology.*

Presentation „**Energy Sector Innovation – Financial Network: New Possibilities for Financing of Investigation and Experimental Development**“ was made at the annual conference „Thermal Energy and Technologies“, which took place at Kaunas University of Technology. Presentation was made by Vaclovas Kveselis, who is the project manager in EIFN project.

The conference is an annual event attracting wide audience from scientific and academic community, energy supply and distribution companies in heat, electricity and gas sectors, state institutions operating in energy sector like state regulator, designers, energy experts and auditors.

Presentation was made at the working section “Heating, heat supply and cogeneration” and attained great interest and many questions. In a whole the project was considered as useful and the suggestion was that the outcomes of the project should be widely disseminated for energy community.

The paper was also published in the proceedings of the conference.
