What were the remarks or suggestions from the attendees concerning methodologies and tools for financial service procedures?

What were other remarks or suggestions from the attendees?

To organize more workshops about the same topic to be able to understand every think related to this area.

CONCLUSIONS OF THE EVENT

There is a huge interest in the topic of risk management and valuation for renewable energies. However the topics of real options valuation methods and simulations technicques (that can be applied to this kind of entrepreneurial projects in the field of renewable energies) are hard to be understood. If could be very interesting organizing one week courses instead one day conferences to cover the topic for both entrepreneurs and financial institutions.
